

## **Caretakers Interview Questions**

1. How long ago were they diagnosed with Parkinson's?
2. How often are the patients taken for physiotherapy or any other type of therapy? (duration + type?)
3. Are there any adaptations or tools they use to make daily life easier (e.g., special utensils, walking aids)?
4. How often do you take them out for activities?
5. How often do you go for doctor appointments?
6. How do you tell the doctors about the patient's disease progression?
7. Do you use any technology or apps to manage the daily activities as a caretaker?
8. Would you want to automate some of your caretaker responsibilities?
9. Do the patients use mobile phones regularly? How easy/difficult is it for them?  
(Plz elaborate) Do they experience problems with memory or concentration?
10. Is there anything you wish people better understood about living with Parkinson's?
